Announcement of Completion of the Second Building of PT.SIIX EMS INDONESIA

SIIX Corporation hereby announces as described that our subsidiary, PT.SIIX EMS INDONESIA(SEK), has completed construction of its second building.

SEK, our second manufacturing plant in Indonesia, has been operating in Karawang Industrial Park, Karawang Province, West Java, near Jakarta, since 2011. In recent years, Indonesia has been attracting attention as a production site aiming to become the next China, and demand for electronic circuit board mounting has been increasing with the trend toward electrical components in motorcycles and automobiles. Therefore, we have decided to build a second building in the same factory to capture more business. The total floor space of SEK, including the existing first building (approx. 11,000 m2) and the newly completed second building (approx. 15,000 m2), is approximately 26,000 m2, and the number of production lines can be quadrupled to a total of 40, ensuring sufficient capacity for future business expansion.

Indonesia, with a population of 270 million (the fourth largest in the world), is a domestic demand-oriented economy with strong consumer spending, and high economic growth is expected. We will respond to the demand from customers in various business fields.
