Announcement of Construction of New Building of Thai SIIX Co., Ltd.

SIIX Corporation hereby announces as described that our subsidiary, Thai SIIX Co., Ltd. (hereinafter “SET”), has decided to construct a new building to expand the factory area.

SET, our manufacturing plant in Thailand, has been operating in Samutprakan near Bangkok since 1988. In 2021, the company integrated its business with SIIX Bangkok Co., Ltd., which was a sales subsidiary in the country, to combine sales and manufacturing functions to meet the manufacturing needs of Thailand and the neighboring ASEAN region.

In recent years, demand for electronic board mounting has been very strong in Thailand, especially for automotive-related equipment, and business with global customers has been increasing. The company decided to renovate the plant and expand the production area so that up to 60 production lines can be installed.

The purpose of the construction is also to renovate the current building due to its aging and to utilize the production area more efficiently. The company will increase its production capacity to meet future business expansion with global customers.
